EXPERIENCE

Elections Canada

Training Materials Developer | 2014 - Present

- Designed and developed e-learning modules for thousands of election administrators across Canada
- Coordinated content according to the subject-matter expert's needs and learning objectives
- Created digital visual assets to support learning objectives
- Gathered user feedback regarding the learning modules for iterative improvements
- Developed a widget for user navigation and progress tracking in HTML5 and JavaScript for Adobe Captivate
- Partnered with colleagues to design and user test an alternative ballot counting solution
- Assisted lead videographer with setting up shoots, filming and creating motion graphics
- Configured and managed a Learning Management System of 5000 users as a system administrator

Freelance

Full-Stack Developer | Jan 2018 - Mar 2018

- Discussed initial proposal with client to outline ideas of their online business card
- Developed mockups and prototypes to communicate interaction and art style
- Met with the client to review design mockups and receive approval for the website direction
- Created the art assets for the website and programmed the website in HTML, CSS and JavaScript
- Programmed a content management system by integrating Firebase realtime databases and VueJS into the website
